

# AZAMABAD TEA ESTATE

## To Whom It May Concern

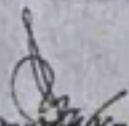

This is to certify that following result was obtained from the field trial conducted in section no. 32 :-

Plot (I) : Urea + DAP + Cytosyme - 34 Kg. (225 Bushes)  
@ 2 Kg./Drum @ 2 Kg./Drum @ 200 ml./Drum

Plot (II) : Urea + Agrovita + Agrovita Booster - 40 Kg. (225 Bushes)  
@ 2 Kg./Drum @ 400 ml./Drum @ 200 ml./Drum

It was also noticed that the infestation of Looper is less in Plot (II) trial.

Sanjivani (Suraj Shree Chemicals Ltd.) @ 50 Kg./Hectare was mixed with cow dung and applied to the collar region of six months old plants in Section No. 32 (Y.T). The growth of the plants was quite impressive compared to the area where only cow dung was applied.

**TO WHOM IT MAY CONCERN**

This is to certify that in Pailakheti section of our garden, Agro Vita @ 1 litre per hectare was given as foliar spray and Sanjivni @ 50 kg per hectare was mixed with vermi compost and placed in the collar region. This section was in a poor shape. But after application of Agro Vita and Sanjivni there has been remarkable improvement in bush health and productivity.
