EFFECTIVE IPM SOLUTIONS

Pheromone Traps

Efforts are on to make farming free from harmful chemicals and adoption of sustainable, cost effective solutions for IPM. Pheromone Traps are designed work as mating disruption technology and control the population of pest .

The following are key advantage of the low cost Pheromone Technology :

- Pest presence detection.
- Pest Population estimation.
- Monitor population build up
- Recommendation for Pest control measure.

Pheromone traps are fitted with lures loaded with effective pheromone blends which are effective for trapping the insect . Being a targeted and specific control system , it does not harm non target pests. Its is more of a preventive control with zero effect on soil, water and human.

Suraj Shree Chemicals Ltd, has obtained know how from INDIA's Premier most institute and pioneer Government of India institute CSIR-IICT, Hyderabad for making pheromone traps and lures
